

Main idea

AutoHistory is a cloud-based and mobile platform that lets owners create a fully auditable record of every maintenance event their vehicles experience—oil changes, tire rotations, repairs, and more—by uploading receipts, photos and notes linked to mileage. The system automatically pulls vehicle data via VIN (or allows manual entry) and provides authorized repair shops with instant access to the history so they can add a “verified & performed by professional” tag on new service entries. This creates an immutable, shop-validated maintenance trail that buyers can view through an embeddable badge on listings, giving them confidence in the vehicle’s condition while helping sellers demonstrate continuous care and potentially command higher sale prices.

Features

Summary

Category	Feature	Purpose
Core Vehicle Management	• Sign-up / Profile (email, phone, social login) • Add/Remove/transfer Vehicles via VIN lookup or manual entry (make/model/year) • Multiple vehicles per account (up to 3 for free, paid for more)	Create a unified dashboard for all owned cars
Maintenance Event Capture	• Pre-defined event types (Oil change, Tire rotation, Brake service, etc.) with optional custom type • Manual entry of mileage, date, garage name, and notes • Upload receipts / photos (PDF, JPEG, PNG) • Automatic OCR to extract key data from images	Build a detailed timeline for each vehicle
Shop Integration	• Webportal for authorized repair shops • Shop dashboard: view assigned vehicles, add “verified by professional” tags, upload proof (photo/receipt) • Push notifications to owner when shop adds a verified event	Enable real-time, authenticated updates from service centers
Timeline & Reporting	• Interactive calendar & list views of all events per vehicle	Give users an at-a-glance overview and easy sharing

Category	Feature	Purpose
	• Filter by date range, mileage, event type	
Partner Badge SDK	• Responsive badge widget (static & animated) that can be embedded in third-party listings • On-click modal shows the vehicle's maintenance history with shop-verified tags • Configurable visibility settings (public, private, partner-only)	Provide a trust signal to buyers on marketplaces
Privacy & Security	• Granular sharing controls per vehicle (share all events, share only mileage+date, no sharing) • End-to-end encryption for uploaded files • GDPR/CCPA compliance framework	Protect user data while enabling transparency
Notifications & Reminders	• Service due alerts based on mileage or time intervals (e.g., next oil change at 10,000 miles) • Shop-initiated reminders for upcoming appointments • Email/SMS push notifications • AI-driven suggestions appear during the event capture flow (e.g., "Your last brake pads were replaced 6 months ago—consider new ones from XYZ"). • Leverages mileage, service history, and regional inventory data to surface timely offers.	Keep owners proactive about maintenance Increases upsell opportunities for partners; improves user experience by offering relevant solutions at the right moment.
Analytics & Insights	• Dashboard for owners: average service cost, frequency, upcoming needs • Marketplace partners: badge performance metrics (clicks, conversion lift) • OEM data feeds (anonymized)	Offer actionable insights and monetization opportunities

Category	Feature	Purpose
	Data can be shared with Insurer for a customized insurance fee	
Shop Spotlight	• Sponsored “Featured Repair Shop” slots that appear in the owner’s main dashboard and on the event creation screen. • Dynamic rotation based on user location, vehicle type, and service history. • Optional “Call-to-Action” button (e.g., “Book Now”, “Get Quote”).	Drives foot traffic & appointments for partner garages; generates revenue via sponsorship fees.
Parts Marketplace	• In-app widget that shows relevant spare parts (OEM or aftermarket) tied to the vehicle’s make/model/year and upcoming service events. • Partner sellers can bid on placement; price is per click/lead. • Includes quick “Buy Now” link to partner e-commerce site.	Provides a seamless purchasing path for owners, while giving parts suppliers visibility and sales leads.
Help & Support	• In-app FAQ, live chat, ticketing system • Community forum for owners to share tips	Reduce friction and build community
